PROFILE

Senior Full Stack developer with more than six years of experience designing, building and shipping business web applications: ERP, institutional back-offices, e-commerce platforms and automation. Specialised in Java / Spring Boot, I own projects end to end, from requirements analysis to release and maintenance (Docker, CI/CD). Experienced in fully remote work with France, I work in English and French, on hours that overlap with Europe.

TECHNICAL SKILLS

Back-end: Java, Spring Boot, Spring MVC, JEE, PHP, Symfony, CodeIgniter, C#, .NET Core API, Node.js, API REST, WebSockets
Front-end: React, JavaScript, TypeScript, AngularJS, HTML5, CSS3, Bootstrap, jQuery, JSP
Databases: Oracle, PostgreSQL, MySQL, Elasticsearch
DevOps & Cloud: Docker, GitHub Actions, GitLab CI, Jenkins, Azure DevOps, Azure Functions, Maven, Tomcat, JBoss
Mobile: Ionic, Xamarin
Tools: Git, Postman, DBeaver, VS Code, NetBeans, Android Studio
Methods: Agile / Scrum, Requirements gathering, Object-oriented design, Multi-tier architecture

PROFESSIONAL EXPERIENCE

Full Stack Developer 2020 – Sep 2026
BICI · Madagascar

Internal projects, projects for local clients and remote work on international projects as a consultant.

- Requirements analysis, relational database modelling (MySQL, PostgreSQL, Oracle), modular and scalable architectures
- Secure REST APIs with Java / Spring Boot, transaction management, performance tuning
- Dynamic, responsive user interfaces (React, JSP)
- Unit and functional testing, SQL query optimisation
- Test and production environments with Docker and CI/CD (GitHub Actions, GitLab CI), monitoring and updates
- Corrective and evolutionary maintenance of internal applications

Tech environment: Java, Spring Boot, React, JSP, MySQL, PostgreSQL, Oracle, Docker, Git, CI/CD, WebSockets

NOTABLE ENGAGEMENTS

ASYNCR – business management ERP 2024 – Sep 2026

- Internal ERP built at BICI, from the project start in 2024 to September 2026
- Contributed to every module: sales, purchasing, inventory, cash desk, accounting, third parties, document management
- Management dashboard: revenue, sales for the day, week and month, trend chart
- Analysis, forecasting, reporting and history modules; global search and configurable lists
- **Outcome:** One tool to run and track the whole business, with key indicators right on the home page.

Tech environment: Java, JEE, JSP, JavaScript, HTML/CSS

Ketrika.com – e-commerce & online ticketing 2024 – Sep 2026

- Project maintainer from 2024 to September 2026
- Design overhaul: improved ergonomics and navigation
- Front-end and back-end development (Java, JEE, JSP) and REST APIs for dynamic content
- Online ticketing with an interactive seating plan and real-time seat availability
- **Outcome:** A smooth, engaging booking journey, better system performance and higher user satisfaction.

Tech environment: Java, JEE, JSP, API REST, JavaScript, PostgreSQL, Bootstrap

OMAPI — Malagasy Industrial Property Office

May 2023 – May 2024

- Design and architecture of the back-office application
- Generic functions for code reuse
- Generic screens (entry, list, detail, edit) for a consistent UI
- New features driven by user needs, database integration, unit and integration tests
- **Outcome:** A consistent interface across every module, and new features shipped quickly thanks to reusable generic code.

Tech environment: React, Java, Spring, HTML, CSS, MySQL

IT DevOps Consultant — SAFRAM (France), remote

May 2022 – April 2023

- Set up and managed CI/CD pipelines with Azure DevOps
- .NET Azure Functions automating business processes
- Monitoring and maintenance of Azure services (availability, performance)
- **Outcome:** Automated deployments and business processes that run without manual intervention.

Tech environment: Azure, Azure DevOps, .NET, C#

Freelance Web Developer

Aug 2021 – Apr 2022

Supermarche.mg • Madagascar

- Optimised and developed the supermarche.mg and express.mg e-commerce sites
- Custom internal applications for the company
- Platform automating purchase orders based on stock levels
- Owned deployments with Jenkins
- Complex SQL queries and Google Data Studio reports for decision-makers
- **Outcome:** Faster stores and regular, stress-free releases.
- **Outcome:** Automated restocking that frees teams from repetitive tracking work.
- **Outcome:** Up-to-date, self-service reports for decision-makers.

Tech environment: PHP, MySQL, JavaScript, HTML, Bootstrap, WordPress, SQL, Jenkins

Web Development Intern

2019 • 3 months

Inother SARLU • Antananarivo

Designed, built and deployed an e-commerce platform selling food products.

- Front-end and back-end of the platform
- Database design
- Environment configuration
- **Outcome:** An e-commerce platform delivered and deployed by the end of the internship.

Tech environment: Symfony, PHP, jQuery, MySQL

EDUCATION

Master's (Year 2) BIHAR — Big Data Intelligence for Human Augmented Reality

2026 – 2027 • in progress

ESTIA — École Supérieure des Technologies Industrielles Avancées • France

Focus areas: Big Data, Machine Learning, Deep Learning, MLOps, Hadoop / Spark, SQL / NoSQL, Cloud

Master's (Year 1) in Application Development

2025 – 2026

IT University • Madagascar

Bachelor's in Computer Science, Application Developer track

2016 – 2019

IT University • Madagascar

Scientific Baccalaureate (Series D)

2016

Lycée privé « La Flèche » • Madagascar
